

Read the passage and answer the questions:

I'm Heba. I want to be an astronaut because I'm interested in stars and the planets. It is important to study other planets because it helps us understand our own planet, and this might help us solve some of Earth's problems. When you see videos of the international space station, it looks **fun** living without gravity. The people float all the time. I have read a lot about the planet Mars and the research scientists are doing.
