

تدريب 3×2

$$(3 + 1) \times 3$$

$$(\dots \times 3) + (\dots \times 3)$$

$$\dots = \dots + \dots$$

تدريب 6×2

$$(3 + 2) \times 2$$

$$(\dots \times 2) + (\dots \times 2)$$

$$\dots = \dots + \dots$$

تدريب 7×0

$$(0 + 2) \times 0$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

تدريب 6×4

$$(3 + 2) \times 4$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

الطريقة الثانية

$$(\dots + \dots) \times 3$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

أوجد بطرifتين 8×3

$$(\dots + \dots) \times 3$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

الطريقة الثانية

$$(\dots + \dots) \times \dots$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

أوجد بطرifتين 4×6

$$(\dots + \dots) \times \dots$$

$$(\dots \times \dots) + (\dots \times \dots)$$

$$\dots = \dots + \dots$$

أوجد الرقم الناتج كما يمثل : " $(\dots \times 2) + (1 \times 2) = 0 \times 2$ "

$$(\dots \times t) + (2 \times t) = 10 \times t$$

$$(\dots \times 2) + (2 \times 2) = t \times 2 \quad (1)$$

$$(\dots \times 7) + (3 \times 7) = 9 \times 7$$

$$(\dots \times 5) + (t \times 5) = 9 \times 5 \quad (2)$$
